

Your Red Bull Basement 2024 Submission: Migraine Mastery Platform

One sentence summary

This platform has transformed how I manage my migraines, from accurate diagnosis to personalized care and community support.

Idea

This is a well-rounded migraine management platform integrating with one of the most accurate, deep-learning-based symptom checkers built on the TabNet algorithm, along with educational resources, blogs, and articles. The remaining features include one-on-one consultations by experts tailored to each individual's needs and an online forum through which patients can interact and share experiences, make use of self-care resources, and better understand migraine causes and treatments.

Mission

Migraine is the 6th most deadliest disorder and its detection is difficult, so we help in migraine diagnosis by providing an accurate symptom checker for early detection, personalized insights, educational resources on triggers and treatments, and access to a supportive community, reducing isolation and

improving overall migraine management. Also, we provide one-on-one interaction with professionals.

Market

We are targeting migraine sufferers seeking better diagnosis and management, healthcare providers aiming to enhance patient care, caregivers supporting loved ones with migraines, health enthusiasts interested in preventative health measures, insurance companies looking to improve patient outcomes, and corporate wellness programs supporting employee health.
